PROJECTS

Self Deployed AI Course Creator - AI Powered Curriculum Generator, Full Stack Project

[Repo](#) | [Deployed Site](#)

- Stripe, Youtube and OpenAI APIs integrated to allow for subscription payment and course material generation.
- NextAuth & Google Credentials API for login / tokens / session authorization & authentication
- Implemented Prisma and PlanetScale and Zod for query building, migrations & database management
- Docker, DigitalOcean, nginx, Certbot for secure self hosting NextJS due to timeout limits on free Vercel
- Github Actions (CD/CI) for automating new changes to the code. Redeploy and reboot services written from Github

Trello Clone, Full Stack Project

[Repo](#) | [Deployed Site](#)

- OpenAI's ChatGPT-4 API to assist with summarizing the user's tasks for the day.
- React Beautiful's Drag and Drop library for each todo column and task.
- Integrated Zustand for state management.
- Added Appwrite functionality for data persistence and management
- TypeScript (Next.JS), and Tailwind CSS to add styling and create smooth frontend UX.

Asylum Application for Non-Profit, Full Stack Project

[Repo](#)

- Worked with stakeholders to communicate their expectations for the project and how the team plans to execute.
- Given tickets and returned deliverables in the given timeframe.
- Created videos to share with stakeholders how their ideas had been implemented.
- Axios library to interface with API.
- Auth0 for authentication and authorization on certain apis.

Nike Website Clone, Full Stack Project

[Repo](#) | [Deployed Site](#)

- Showcased knowledge and expertise with Tailwind CSS & React.
- Made use of React's state for dynamically styling components and cards as the user interacts with the site.
